

# Meet the Future: 4-Gas Detection with 2-Year Runtime is Here

Jonathan Whittam  
Product Specialist Manager  
Shawcity

## Current Personal Gas Monitors

Battery life 8 hours > 14 hours

Rechargeable or replaceable Lithium

One per worker due to recharging intervals

Replacement of gas sensors

Annual servicing

## Meet the Future

BW Clip4

Multi Gas Clip Simple

**8**  
HOURS

Battery life 8 hours > 14 hours

Meet the Future...

Battery life 2 years:

- Activate for 24/7 always-on protection
- Use continuously for two years
- Dispose and replace

## Rechargeable or replaceable lithium batteries

### Meet the Future...

No battery recharging or replacement required:

- No down time
- Always ready to use
- Lower cost of ownership

One per worker  
due to recharging intervals

## Meet the Future...

Reduction in the fleet number:

- No recharging down time
- Workers on different shifts can share the same monitor
- Lower cost of ownership

# Replacement of gas sensors

## Meet the Future...

No sensors need replacing:

- No down time
- No consumables
- Lower cost of ownership

## Annual servicing

## Meet the Future...

### Annual servicing not required:

- No down time
- No replacement hire
- Lower cost of ownership

Thank you.
